Contextual Colors

Aside from the main brand colors, ACSS provides you with the following contextual colors:

Warning (alert, caution)

Info (general information)

Success (safe, correct)

Danger (error, wrong)

These follow the contextual color standard set by Bootstrap many years ago, providing you with colors that indicate a specific "notice" for the user and that [typically] have nothing to do with a website's brand palette.

Configuring Contextual Colors

Contextual colors are preconfigured, but you can easily adjust them via the Palette tab of the ACSS dashboard:

Contextual Colors

Contextual Color Utilities

Contextual Color Classes

Contextual Color Variables

Contextual Color Partial Variables

The following groups of classes have access to the contextual colors by default:

- .text--
- .bg--
- .link--

The class naming convention is the same as with all other colors in ACSS. Append {color} or {color-shade} to the above classes on the desired element (e.g. .text--warning-light)

Contextual Color Variables

Along with classes, you also get access to contextual color variables and contextual color partial variables. These variables allow you to reference contextual colors or parts of contextual colors when creating custom classes or within custom CSS.

The naming conventions for contextual colors are the same as all the other colors in the ACSS system: var(--{name}) and var(--{name}-{shade}) .

The following partials are available for each contextual color:

- {color}-hex
- {color}-hsl
- {color}-h
- {color}-s
- {color}-l
- {color}-rgb
- {color}-r
- {color}-g
- {color}-b

These partials remove all limitations from the contextual color system, allowing you to make custom shades, transparencies, hovers, and more.

This is a warning alert. It has a warning-colored background and dark warning text. Isn't it a fantastic alert?

This is just placeholder text. Don't be alarmed, this is just here to fill up space since your finalized copy isn't ready yet.

Traditionally our industry has used Lorem Ipsum, which is placeholder text written in Latin. Unfortunately, not everyone is familiar with Lorem Ipsum and that can lead to confusion.
