"Best product I've ever used, hands down. Definitely recommend!"

There's no other product I would rather use than this one. I've told all my friends and family about it and can't wait to buy more in the future.

If you build a grid with utility classes only you create a nightmare in case of changes. Imagine this grid is spread over the website for 10 different services, 10 different testimonials and so on. You would need to go into every grid on every page and change.

CAUTION: Avoid This TRAP When Using Grid Utility Classes - Digital Ambition.mp4

training.digitalgravy.dev/caution-avoid-this-trap-when-using-grid-utility-classes/?ct_builder=true&ct_inner=true

What you should do instead

Custom class `'.testimonial-grid'`

In Oxygen we would use the grid builder which is not yet available in Bricks. Instead we can build the grid with CSS in Bricks

Because we build the grid on the custom class we can put it anywhere on our website and have global control over it. Nevertheless we can additionally style it independently either on the ID level or with more custom classes or even with utility classes
