The screenshot shows a web browser window with two tabs: 'Automatic CSS - bricks-acss' and 'Modal (Builder)'. The address bar shows 'bricks-acss-new.local/modal-2/?bricks=run'. The browser's bookmark bar contains various links like Facebook, Hey!, Business, Personal, Hosting, Resources, Basecamp, Automatic.css, Frames, Hubspot, HelpScout, GenLus, InnerCircle, ACSS, Hey! Notification L..., UserMaven, Avventure, JS, MTLC, Examples, Docs: Home (Tem..., and Home (Builder). The main content area displays the 'automatic.css' logo at the top left. A dark sidebar on the left is titled 'Frames Modal' and includes a search bar, 'CONTE...', 'STYLE', 'Hide Modal in Builder' (with a toggle), and a list of settings: 'SETTINGS', 'OVERLAY', 'MODAL POSITIONING', 'BODY CONTAINER', and 'CLOSE ICON'. The central workspace is a large gray area with the 'automatic.css' logo at the top center. A white text box with the text 'You see the modal effect inside the builder' is centered in the workspace. Below the text box is a white horizontal bar. A mouse cursor is positioned over the white bar. On the right side, a 'Structure' panel shows a tree view with 'Section', 'Container', and 'Frames Modal' (highlighted with a blue circle and the number '1'). A video inset in the bottom right corner shows a man wearing a cap and glasses, speaking. The video player controls at the bottom show a progress bar, a play button, and a timestamp of 01:40.

The screenshot shows a web browser window with three tabs: 'Automatic CSS - bricks-acss', 'Modal (Builder)', and 'Modal - bricks-acss'. The address bar shows 'bricks-acss-new.local/modal-2/?bricks=run'. The browser's bookmark bar contains various links like Facebook, Hey!, Business, Personal, Hosting, Resources, Basecamp, Automatic.css, Frames, Hubspot, HelpScout, GenLus, InnerCircle, ACSS, Hey! Notification L..., UserMaven, Avventure, JS, MTLC, Examples, Docs: Home (Tem..., and Home (Builder). The main content area displays a modal builder interface. On the left is a sidebar with settings for 'Frames Modal', including a text input, 'CONTENT' and 'STYLE' tabs, a 'Hide Modal in Builder' toggle, and expandable sections for 'SETTINGS', 'OVERLAY', 'MODAL POSITIONING', 'BODY CONTAINER', and 'CLOSE ICON'. The 'MODAL POSITIONING' section is currently expanded, showing options for 'Place in relation to:' (set to 'Page'), 'Horizontal' alignment, 'Vertical' alignment, 'Vertical offset' (1em), and 'Horizontal offset' (1em). A white text box with blue text 'These settings are all in relation to the page' is positioned over the 'Vertical' alignment options. The main canvas shows a large green modal with a white header bar and a close button in the top right corner. On the right side of the modal is a 'Structure' panel showing a hierarchy: 'Section' -> 'Container' -> 'Frames Modal'. In the bottom right corner, there is a video inset of a man wearing a baseball cap and glasses, speaking. The video player controls at the bottom show a progress bar, play/pause buttons, and a timestamp of 07:27.

The screenshot shows a web browser window with the URL `bricks-acss-new.local/modal-2?bricks=run`. The browser's address bar and tabs are visible at the top. The main content area is a green modal with the `automatic.acss` logo in the top left corner. A white text box in the center of the modal contains the text: `Now you can do anything what you can do with a normal block.` Below the text box is a white rectangular button. On the left side of the modal, there is a sidebar with the title "Inner" and a search bar. Below the search bar is a list of "OTHER CLASSES (2026)" including `.form--light`, `.fr-container-gap`, `.fr-intro-bravo`, `.fr-content-gap`, `.fr-accent-heading`, `.bg--shade`, `.custom-heading`, `.grid--12`, `.col-span--8`, `.col-end--9`, `.col-start--8`, `.col-end--8`, `.col-start--9`, `.btn--custom`, `.feature-card`, `.feature-card__icon`, `.feature-card__heading`, `.feature-card__text`, `.feature-card__button`, and `.dual-buttons-wrapper`. At the bottom of the sidebar is an "Order" section with a value of 0. On the right side of the modal, there is a "Structure" panel showing a tree view with the following components: `Section`, `Container`, `Frames Modal`, and `Inner`. In the bottom right corner of the browser window, there is a small video inset showing a man wearing a cap and glasses, speaking. The browser's status bar at the bottom shows the time as 08:55 and a volume icon.

The screenshot displays a web browser window with the URL `bricks-acss-new.local/modal-2/7bricks=run`. The browser's address bar shows "Not Secure" and the page title is "Component Overview- Frames Accessible Modal & Trigger.mp4". The browser's tab bar includes "Automatic CSS - bricks-acss", "Modal (Builder)", "Modal - bricks-acss", and "Website Ipsum - For the type". The browser's bookmark bar lists various sites like Facebook, Hey!, Business, Personal, Hosting, Resources, Basecamp, Automatic.css, Frames, Hubspot, HelpScout, GenLus, InnerCircle, ACSS, Hey! Notification L..., UserMaven, Avventure, JS, MTLC, Examples, Docs: Home (Tem..., and Home (Builder).

The design tool interface features a left sidebar with a "b" logo and a "Inner" tab. The "Inner" tab shows a "content-gap" property with a value of "2". Below this, there are "CONTE..." and "STYLE" buttons. The "STYLE" tab is active, showing "SPACING" and "Padding" settings. The "SPACING" section includes "Margin" and "Padding" settings. The "Padding" section includes "var(--spac" and "var(--t" settings. The "SIZING" section includes "Width", "Min. width", "Max. width", "Height", "Min. height", and "Max. height" settings. The "POSITIONING" section includes "Position" (static), "Top", "Right", "Bottom", "Left", and "Z-index" settings. The "MISC" section is also visible.

The right sidebar shows a "Structure" panel with a tree view of the component hierarchy. The tree view includes "Section", "Container", "Frames Modal", "Inner", "Heading", "Basic Text", and "Button". The "Inner" component is highlighted with a blue circle and the number "1".

The main content area of the browser shows a green background with the "automatic.css" logo in the top left corner. In the center, there is a white modal box with the title "Modal heading". The modal box contains the following text: "This is just placeholder text. Don't be alarmed, this is just here to fill up space since your finalized copy isn't ready yet. Once we have your content finalized, we'll replace this placeholder text with your real content." Below the text is a blue button labeled "CALL TO ACTION".

At the bottom of the screen, there is a video player showing a man wearing a cap and glasses, speaking. The video player has a progress bar and a timestamp of 09:50.

The screenshot shows a web browser window with multiple tabs. The active tab is titled "Modal (Builder)" and shows a URL "bricks-acss-new.local/modal-2/7bricks=run". The browser's address bar indicates "Not Secure". The page content is a green background with the "automatic.css" logo in the top left. A blue text box in the center reads: "Keep in mind that the modal can be used inside a query loop! So you could easily build a modal menu for example." Below this, a white modal box is displayed. The modal has a heading "Modal heading" and a close button (X) in the top right corner. The text inside the modal says: "This is just placeholder text. Don't be alarmed, this is just here to fill up space since your finalized copy isn't ready yet. Once we have your content finalized, we'll replace this placeholder text with your real content." At the bottom of the modal is a blue button labeled "CALL TO ACTION". On the left side of the browser window, there is a sidebar with a search bar and a list of settings: "Frames Modal", "CONTENTS", "STYLE", "Hide Modal in Builder", "SETTINGS", "OVERLAY", "MODAL POSITIONING", "BODY CONTAINER", and "CLOSE ICON". On the right side, there is a "Structure" panel showing a tree view of the component hierarchy: "Section" -> "Container" -> "Frames Modal" -> "Inner" -> "Heading" -> "Basic Text" -> "Button". In the bottom right corner, there is a video inset showing a man with a beard and glasses, wearing a green t-shirt and a black cap, speaking.

automatic.css

Keep in mind that the modal can be used inside a query loop! So you could easily build a modal menu for example.

The screenshot displays a web browser window with a design tool interface. The browser's address bar shows the URL `bricks-acss-new.local/modal-2/7bricks=run`. The design tool's left sidebar contains various styling and positioning controls, including sections for **STYLE**, **POSITIONING**, **MISC**, and **FLEX**. The **POSITIONING** section shows the modal is set to `Fixed` position. The **MISC** section shows the `Overflow` property is set to `hidden`. The **FLEX** section shows the `Direction` is set to `column`. The main canvas area shows a green background with the **automatic.acss** logo. A modal component is centered on the screen, featuring a white background, a close button (X) in the top right corner, and a blue button labeled **CALL TO ACTION**. A text overlay in blue font reads: **Border radius works as well but keep in mind that you have to set 'overflow: hidden' on the modal!**. On the right side of the design tool, a **Structure** panel shows the component hierarchy: **Section** > **Container** > **Frames Modal** > **Inner** > **Heading** > **Basic Text** > **Button**. A video inset in the bottom right corner shows a man wearing a cap and glasses, speaking.

The screenshot shows a web browser window with the URL `bricks-acss-new.local/modal-2?bricks=run`. The page displays the **automatic.acss** logo at the top. Below the logo, there is a yellow button labeled "I am a button" and a blue text link labeled "Text link". A mouse cursor is hovering over the button. The interface includes a left sidebar with a "Button" section containing a "CONTENTS" tab and a "STYLE" tab. The "STYLE" tab is active, showing options for "HTML tag" (span), "Size" (Default), "Style" (Primary), "Circle" (off), and "Outline" (off). The "LINK" section shows "Link type" as "Select link type". The "ICON" section shows "Icon" as "Icon". The right sidebar shows a "Structure" panel with a tree view: Section > Container > Frames Modal > Inner > Heading > Basic Text > Button > Text link. Overlaid on the page are two text boxes with blue text:

If you use a button or a text link for triggering the modal this is not accessible and you loose a lot!

If you don't know how to trigger modals with an HTML element you should use the trigger element which comes with Frames.

In the bottom right corner, there is a video inset showing a man wearing a cap and glasses, speaking.
