The critical values. Alignment doesn't change regularly

The screenshot shows the Bricks Builder interface. The main canvas displays a video player with a silhouette of a woman against a sunset background. A red callout box with the text "The critical values. Alignment doesn't change regularly" points to the "Width" property in the "SHAPE DIVIDERS" panel, which is set to "125%". The "Height" property is set to "4rem". The "Structure" panel on the right shows a hierarchy of sections and containers. The bottom of the screen shows a macOS dock with various application icons and a system status bar at the bottom right indicating the time as 12:33.
