Margin Bottom is not a good concept because the margin is always related to another element. If you move or take away the element you need to adjust other elements with regards to spacing

Only if you remove the first element of the page you have to deal with spacing

Browser tabs: Inbox (6) - kevin@digitalgravy.co.uk, (2) Home | Digital Ambition Inn..., Delivery - Hero Section by Rizki, Automatic CSS - Site Title - W..., Margin Top - Site Title, Margin Top - Site Title.

Adding an element here is much more efficient. The builder stays on that element and we can add margin top immediately without clicking anywhere else

Find Location Need Help?

You could also put a margin bottom just to the first element and take margin top away from the second element and everything following gets margin top
