The screenshot displays a video player interface for a course titled "PB101- L16 - Simple Accessible Navigation.mp4". The video content shows a man wearing a white cap and glasses, speaking. Overlaid on the video is the Bricks Builder interface, which is used for creating and editing web pages. The interface includes a left sidebar with various settings panels, a central workspace, and a right sidebar showing the page structure.

Left Sidebar (Bricks Builder Settings):

- CONTENT:** Includes a "Border" section with a "Right" icon position and a "Margin" of 10. Below this is a "SUB MENU" section with a "Keep open while styling" checkbox and a "Padding" of 45. The "HAMBURGER TOGGLE" section includes a "Toggle width" and a "Color" picker with a color palette and sliders for Hue, Saturation, Lightness, and Transparency.
- STYLE:** Includes a "Typography" section with an "Active typography" checkbox and an "Icon (Sub menu)" section with a "Right" icon position and a "Margin" of 10.

Central Workspace: Displays a navigation menu with the following items: Home, Units, Practice, Grid 101, Units, Practice, Links, and Messagely. The menu is styled with a dark background and white text. A mouse cursor is visible over the "Grid 101" item.

Right Sidebar (Structure): Shows the page structure with the following elements: Header Alpha, Inner, Logo, and Nav Menu.

Video Player Controls: At the bottom of the video player, there are standard controls including a play/pause button, a progress bar, and a volume icon. The time displayed is 13:51.

Header (Template) Bricks Clean view-source:bricks-clean.local

  border-color: var(--bricks-border-color);  
}
```

This is most important because not every PB gets this right. The Navigation is no Div but a <nav>! And the nav items must be in an unordered list!

This is very important for screen readers!
